

Suspension sets H+H

Product description:

The element is consisted of two galvanized steel wires with diameter of 4 mm and the butterfly clip with thickness of 0.60 mm. It is primarily used for anchoring the suspended cassette construction. The hook on the both sides of the set allows quick fixing into the building structure and insertion of the T-profile.

Range of usage:

The product is used for fixing the drywall elements into solid structures of buildings. It is used to reduce the ceiling in plasterboard or cassette structures.

Characteristics:

Material	Drawn wire / spring steel
Coating	Zinc – min Z100 (ČSN EN 10327)
Thickness	4.00 mm / 0.60 mm (ČSN EN 10143)
Reaction to fire	Class A1 (EN 14195)
Durability	Class B
Hazardous substance	NPD

Packaging:

The suspension sets to length of 515 mm are packed by 100 pcs in carton box. Longer variations are packed by 50 pcs with cable tie. Every dimension is labeled with identification tag.

Recommended storage:

The product is required to store in dry and temperate environment in order to prevent condensation on the surface of the product and damage to the packaging.
